

Eagle EYE

Built for industrial applications. Equipped with real-time data visualization, voice command integration, and advanced AI assistance for hands-free operation in factories and maintenance sites.

Silver Night

A compact, tactical drone designed for high-speed surveillance and covert operations. With its sleek black frame and warning indicators, it excels in reconnaissance and security missions.

Ninja Bat

A high-speed first-person view (FPV) racing drone designed for agility and precision. Its aerodynamic structure and powerful motors make it ideal for competitive drone sports and obstacle navigation.

Casa Goblin

A circular-frame drone with advanced aerodynamic design, featuring self-stabilizing rotors and eco-friendly energy solutions for sustainable aerial transportation.

Snitch Boy V2

A long-range security drone equipped with dual high-definition cameras for night vision and facial recognition, designed for border control and urban monitoring.

oBeta Gladiator

A cutting-edge drone with illuminated rotor rings and integrated AI, optimized for smart urban delivery, emergency response, and real-time navigation assistance.

Sneaky Ricky

**next-generation reconnaissance drone
featuring a reinforced carbon-fiber shell,
thermal cameras, and adaptive AI for
autonomous patrols in high-risk
environments.**

Phi Boomerang

A futuristic quadcopter designed for industrial transport. With its robust frame and high-powered propulsion, it efficiently carries heavy payloads across construction sites and warehouses.
